

## Project 2 classwork day 2

```
import React from 'react';
```

```
const App = () => {  
  const styles = {  
    heading: {  
      color: 'green',  
    },  
    container: {  
      backgroundColor: 'lightblue',  
      color: 'darkblue',  
      padding: '10px',  
      border: '1px solid blue',  
      borderRadius: '5px',  
    },  
    paragraph: {  
      color: 'darkblue',  
      fontSize: '16px',  
    },  
  };  
  
  return (  
    <div>  
      <h1 style={styles.heading}>Inline Style in JSX Example</h1>  
      <div style={styles.container}>
```

```
    <p style={styles.paragraph}>This is a paragraph with inline styles applied.</p>  
  </div>  
</div>  
);  
};
```

```
export default App;
```

output:

## Inline Style in JSX Example

This is a paragraph with inline styles applied.
