

Day-7

App.js

```
import React from 'react'
import True from './True';
import False from './False';
import { useState } from 'react';
const App = () =>
{
  const [data, setData] = useState('null');
  return (
    <>
    {
      data ? (<True/>) : (<False/>)
    }
    </>
  )
}

export default App
```

True.js

```
import React from 'react'

function True() {
  return (
    <div>True</div>
  )
}

export default True
```

False

```
import React from 'react'

function False() {
  return (
    <div>False</div>
  )
}

export default False
```

OUTPUT

True
