

Day -8

Classwork

App.js

```
import React, { useState, useEffect } from 'react';

const App = () => {
  const [message, setMessage] = useState("Hello dear one. learning React...?");

  useEffect(() => {
    console.log('useEffect hook called');

    const timeoutId = setTimeout(() => {
      setMessage("Great.... This is time to learn about HOOKS");
    }, 2000);

    return () => clearTimeout(timeoutId);
  }, []);

  return (
    <div>
      <p>{message}</p>
    </div>
  );
};

export default App;
```

**OUTPUT:**

Great... This is time to learn about HOOKS
