Practice at home day 3:

```
// App.js

import React from 'react';

import GokuApp from './GokuApp';

const App = () => {

  return (

    <div>

      <h1>Welcome to Goku's React Application!</h1>

      <GokuApp />

    </div>

  );

};

export default App;
```

output:

Welcome to Goku's React Application!
